

AI DESIGNING FOR HUMAN DEVELOPMENT

neocognition.ai

Neocognition is a team of researchers, engineers, and consultants that integrates cognitive sciences and management sciences with generative artificial intelligence, by building personal assistants who are experts in their fields. All are committed actors in the emergence of a virtuous collaboration between human and artificial intelligence, where each unfolds its added value in service of the development of individuals and organizations: the neocognition.

CORPORATE E-ASSISTANTS

Equip your employees with personal AI assistants adapted to your specific culture, to increase performance and engagement.

① AI assistants

Erga
(Coach)

Accept difficulties to better act upon them

Upolepsis
(Trainer)

Factualize and not judge the negative to better manage it

Oracle
(Consultant)

Instantly manufacture the expected skills

Focus+
(Coach)

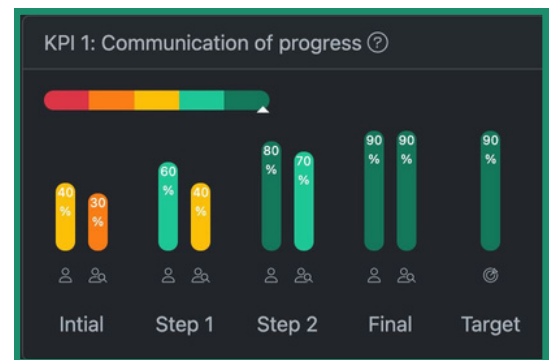

Intensify what is efficient and satisfying

② Progress tracking

Corporate objectives → expected actions

AI assistants: support in applying actions

Tracking of actions application: self + 360
