

Neocognition is a team of researchers, engineers, and consultants that integrates cognitive sciences and management sciences with generative artificial intelligence, by building personal assistants who are experts in their fields. All are committed actors in the emergence of a virtuous collaboration between human and artificial intelligence, where each unfolds its added value in service of the development of individuals and organizations: the neocognition.

AUGMENTED PSYCHOLOGICAL SUPPORT

For independent psychologists or company employees, offer enhanced psychological follow-ups or support with our custom generative AI.
